

## ERRATUM

Vol.2, No.3, P99, 105, 117, 122, 126, 132 shoulder title have following erratum.

Truth:[Environmental Health and Preventive Medicine 2, October, 1997]

Fault: [Environmental Health and Preventive Medicine 3, October, 1997]

The complete contents of Environmental Health and Preventive Medicine Vol.2 were appeared on Vol.2, No.4, P194-P196.

## Environmental Health and Preventive Medicine

Official Journal of the Japanese Society for Hygiene

### INSTRUCTIONS FOR AUTHORS

*Environmental Health and Preventive Medicine* as the official journal of the Japanese Society for Hygiene, is devoted to the publication of definitive studies including original papers, short communications and review articles, on human health sciences related to biological, physical, chemical, medical, psychosocial, and other various environmental factors.

#### Categories of Publication

Submissions may include :

- (1) **Original papers** reporting results of original fundamental research in any branch in the environmental health and preventive medicine field, should conform to the Journal style.
- (2) **Short Communications** reporting on research considered to require speedy publication, receive rapid review. They should be no more than 4 printed pages in length, containing an Abstract of about 100 words, a one-paragraph introduction, an abbreviated Materials and Methods section, Results and Discussion sections (which may be combined), a maximum of 20 references, and no more than 5 items for the display of data (any combination of tables and illustrations).
- (3) **Reviews** on subjects relevant of the field. Submission of an outline of an unsolicited review may be approved by the Editorial Board, after which the complete article will be carefully evaluated before acceptance.
- (4) **Announcements** of scientific meetings and of courses in *Environmental Health and Preventive Medicine* should be submitted at least 1 month prior to issue.

#### Editorial Policies

Submissions must be accompanied with the authors written confirmation that research contained in the paper has not been and will not be submitted to or published in any other scientific journal before a decision has been made as to its acceptability for publication in *Environmental Health and Preventive Medicine*. All authors listed on a manuscript must have agreed to its submission and content, as determined in the Uniform Requirements for Manuscripts Submitted to Biomedical Journals (JAMA 1993; 269; 2282-6). Revisions to text or authors must be approved also by all authors. *Environmental Health and Preventive Medicine* accepts no responsibility for such changes. Associate Editors with broad expertise in all areas of *Environmental Health and Preventive Medicine*, along with a large group of external reviewers provide fair and thorough evaluation of papers submitted to *Environmental Health and Preventive Medicine*. Associate Editors and reviewers are expected to maintain a strict ethical code regarding confidentiality of the material under review. Any relationships that could cause a conflict of interest with regard to a manuscript must be revealed by authors, reviewers, and Associate Editors to the Editor-in-Chief. After review, authors will be promptly informed of Editorial decision. Only written inquiries regarding the status of manuscripts will be answered. Manuscripts only will be returned in the case of rejection. Accepted submissions become the property of the Japanese Society for Hygiene.

#### Preparation of Manuscripts

Original manuscripts must include :

- (1) The author's covering letter containing the information in duplicate.
- (2) Two copies of the manuscript and two sets of original illustrations. One set of original illustrations should be designated for use by the printer.

#### Mailing Address

Manuscripts should be sent to the Editorial Office, Human Research Inc., 2-5-16 Wakaba, Shinjuku-ku, Tokyo 160, Japan

#### Cover Letter

- The paper should be submitted with a covering letter stating
- (1) that the paper is being submitted for consideration for publication in *Environmental Health and Preventive Medicine* ;
  - (2) the exact address for all related correspondence to be sent to and telephone and FAX numbers of the author ;
  - (3) that there has been no previous publication of the paper or a similar paper and that no such publication is intended ;
  - (4) agreement of all authors as to content and authorship of paper ;
  - (5) five key words describing the paper.

#### Format and Style

Manuscripts are to be written in clear, grammatical English. Papers that are not in *Environmental Health and Preventive Medicine* style or that are not in good idiomatic English will be returned to the author without review. Terminology and abbreviations not consistent with internationally accepted guidelines should be avoided. The manuscript should be typed on one side on ISO A4 paper with double spacing throughout, including in tables and illustration legends, with ample margins. Consecutive numbering of all pages is required, with the title page as page 1. The manuscript should follow the order : (a) title, (b) authors and complete names and locations of institutions or laboratories, (c) running title, (d) key words, (e) footnotes, (f) abstract, (g) text and references, (h) tables, (i) legends for all illustration, (j) illustrations and (k) other material.

#### Title Page

##### Title

Titles should be informative and brief, and limited to about 100 characters. Key words necessary to identify the nature of the subject matter must be included in the title.

##### Authors and Their Affiliations

Authors must include their full names, complete with first and middle names or initials. Author's academic degrees should not be included. The full names of institutions and subsidiary laboratories must be given for each affiliated author together with current addresses, including postal code. The name, complete address, telephone and FAX number of the author to whom proofs and correspondence are to be sent should be included separately on the title page.

##### Running Title

A brief running title not to exceed 50 characters must be provided.

##### Key Words

Five key words identifying the nature of the subject matter must be included on the title page. Footnotes to the title page text with superscript Arabic numerals are to be designated consecutively.

#### Abstract

The abstract should contain fewer than about 200 words yet be indicative of the content of the paper. It should indicate the purpose of the study, and the experimental technique, results, and interpretations of the data. All important terms relevant to the content of the paper should be incorporated into the abstract. Abbreviations should be kept to an absolute minimum ; however, if they are needed, they must be properly identified so as to make the abstract independent of the text.

**Introduction**

Brief reference to papers relevant to the problem or question which the author's investigation addresses are sufficient.

**Materials and Methods**

The methods should be briefly but clearly explained. Procedures published previously need only be cited in references. New and significant modifications need complete exposition. Papers reporting human experimentation must be in line with principles of the Helsinki Declaration of 1975, as revised in 1983. Papers involving human subjects must include a statement that informed consent was obtained from each subject or subject's guardian.

Only results of those experiments in which proper attention has been given to experimental ethical considerations toward animals will be published. The statistical guidelines advocated by the International Committee of Medical Journal Editors (Ann Intern Med 1988 ; 108 : 266-73) must be followed.

**Results**

Results should concisely summarize the findings of the study and follow the train of thought presented in the methods section. Textual description of the data must be presented in tables and illustrations.

**Discussion**

Discussion should emphasize the major findings of the study and its significance. Information presented in the previous section must not be repeated. Concise interpretation of data with well-founded speculation may be included.

**Abbreviations for Scientific Units**

Abbreviations for Scientific Units must conform to the System International (SI units).

**Acknowledgments**

Acknowledgments should specify information on technical help, material and financial support including the source(s) and number(s) of the grant (s).

**References**

References should be numbered in the order of their first mention in the text ; cite only the number assigned to the reference.

References should be double-spaced and be presented in numerical order. All references should be verified and checked that they have been cited in the text. Literature references must conform to the Uniform Requirements for Manuscripts Submitted to Biomedical Journals (JAMA 1993 ; 269 : 2282-6) as the following examples.

For example :

(1) Papers published in Journals

Tarumi K, Hagihara A, Morimoto K. An investigation of effects lifestyle on care-seeking behavior using data from health insurance claims.

Jpn J Hygiene 1995 ; 49 : 984-97.

(2) Books and other monographs

Grundy F. Preventive Medicine and Public Health. London : H. K. Lewis Co. Ltd., 1960.

(3) Contributions in Books

Waldman LK. Multidimensional measurements of regional strains in the intact heart. In : Glass L, Hunter P, McCulloch A, editors. Theory of Heart. New York ; Springer-Verlag, 1991 : 145-74.

**Tables**

Tables of numerical data should be numbered and cited in numerical order in the text, and each be printed (also with double-spacing) on a separate page, numbered in sequence in Arabic numerals (Table 1, 2, etc.), provided with a heading, and referred to in the text as Table 1, Table 2, etc. Legends giving explanation

sufficient to make the data intelligible without reference to the text must be typed on the same page.

**Illustrations and Illustration Legends**

Illustrations must be cited in the text in numerical order using Arabic numerals. Illustrations should be numbered in Arabic numerals according to the sequence of their appearance in the text, where they are referred to as Fig. 1, Fig. 2, etc. The name of the first author, the illustration number, and designation of the top of the illustration should be typed on a label adhered to the back of each illustration. Line drawings are to be submitted in either printouts from a laser printer, or in camera-ready form on a white background, or in black ink. Illustration legends should be double-spaced on a separate sheet, and should include a brief title and a concise explanation of each illustration.

**Typesetting from Disks**

*Environmental Health and Preventive Medicine* is now copy editing accepted manuscripts electronically. Authors are encouraged to send a 3 1/2 disk of the paper along with the required four hard copy printouts when submitting revised manuscripts. The entire manuscript should be contained in one file. Tables and mathematical material may be excluded from the disk file and presented only in the accompanying hard copy. Disks will not be returned to the authors. The disk should be labeled on the outside with *Environmental Health and Preventive Medicine*, the first author's name, a partial title of the manuscript, and the name of the computer file used to access the manuscript on disk. The name of the computer used (e.g., IBM/PS2), the name of the operating system and version (e.g. DOS3.3), and the word processing program and version (e.g. Word Perfect 5.0) must be provided. The following word processing programs are preferred : Word Perfect (IBM or Macintosh), Word perfect for Windows, Microsoft Word (IBM or Macintosh), Mac Write II. Authors should not use the Fast Save option on Macintosh computers. Ensure that the letter "i" and the number "1" (also "O" and number "0") have been used properly, and format your article (tabs, indents, etc.) consistently. Characters not available on your word processor (Greek letters, mathematical symbols, etc.) should not be left open, but indicated by a unique code (e.g. @, #, etc. for the Greek letters). Such codes must be used consistently throughout the text. The author should provide a list of such codes and a key. Do not allow your word processor to introduce word splits and do not use a 'justified' layout. The Journal does not assume responsibility for errors in the conversion of newly released software, customized software, or special characters.

**Page Charge and Reprints**

No page charge is necessary for black-and-white printing. In the case of color photographs the cost of publishing will be borne by the authors. Reprints may be ordered at prices shown in the reprint order form which will be sent to the author.

**Proofs**

Proofs will be sent to authors without manuscripts. Only printing errors should be corrected. Changes in the manuscript will not be allowed. The corrected proofs must be returned within 48 hours after-receipt, preferably by FAX.

**Advertisements**

Advertisements must be received 5 weeks prior to the date of the issue in which the advertisement is to be published. Issues are published quarterly. Inquires regarding advertising should be directed to : Editorial Office, Department of Preventive Medicine and Public Health, Human Research Inc., 2-5-16 Wakaba, Shinjuku-ku, Tokyo 160, Japan. TEL : +81(3) 3358-4001 FAX : +81(3) 3358-4001.
